## Arctic Paper Kostrzyn Receives EU Ecolabel Certification

**Arctic Paper Kostrzyn, known for producing high-quality uncoated, wood-free offset paper and graphic paper, has received the prestigious EU Ecolabel certification for its entire product range. This recognition confirms the company's commitment to environmental responsibility and sustainable production practices, as the EU Ecolabel is awarded to products that demonstrate a reduced environmental impact throughout their lifecycle, from raw material sourcing to manufacturing.**

The EU Ecolabel is the official European Union environmental excellence label, recognizing products that meet the highest sustainability standards. By supporting eco-design, sustainable development, and environmental claims, the EU Ecolabel helps industries, businesses, and consumers make more sustainable choices. By achieving this certification, Arctic Paper Kostrzyn has reached an important milestone in its long-term strategy, which focuses on reducing environmental impacts across the entire supply chain and delivering environmentally friendly products.

"We are pleased to announce that our products have been awarded the EU Ecolabel. This achievement highlights our commitment to developing sustainable practices and enables us to communicate our efforts more effectively to customers, suppliers, and other stakeholders. Obtaining the EU Ecolabel prepares us to meet the growing demand for wood-free uncoated paper that meets high environmental standards. Moving forward, we will continue to focus on improving our environmental performance and sustainable practices," said Michał Jarczyński, CEO at Arctic Paper. "

Arctic Paper Kostrzyn has been supplying high-quality uncoated graphic paper under the Amber brand to Europe for many years. These products are used in modern printing and processing, including the production of books, brochures, documents, and envelopes. The company has developed a comprehensive sustainability strategy that covers the entire supply chain. One example of such efforts is the advanced heat recovery system, which increases energy efficiency in production by reusing heat, thereby significantly reducing energy consumption. Furthermore, ongoing investments in solar power plants have increased the share of renewable energy in the mill's overall energy consumption.

### **About EU Ecolabel**

The EU Ecolabel is the official European Union environmental label awarded to products and services that meet the highest environmental standards. More information can be found at:

<https://ec.europa.eu/environment/ecolabel>.

**Arctic Paper Group** is a European company and a leading producer of high-quality graphical fine paper, bio-based packaging solutions, high-quality wood pulp, and energy, increasingly of non-fossil origin. The company is present with its own sales offices in Europe. Arctic Paper S.A. is listed on the Warsaw Stock Exchange and NASDAQ in Stockholm. The Group is the main owner of the listed Swedish pulp producer Rottneros AB.
