## **9. Assessment of the Company's condition**

In 2022, Arctic Paper achieved very good results. It was a time of very dynamic changes, many factors had a significant impact on the Company's operations, which modified its activities on an ongoing basis, adapting them to the changing business environment.

The war in Ukraine also affected the Company's operations to some extent.

The post-pandemic recovery in the European economy was conducive to increasing sales. Inflation factors played a significant role, which resulted in an increase in production costs.

This was particularly noticeable on the energy market, but the increase in costs also affected other components, such as services or transport.

Arctic Paper noticed high demand for pulp throughout the year. A strong market impulse related to the recovery of the global economy after the pandemic, as well as the continuation of the trend of replacing plastic packaging with products made of natural raw materials, such as pulp, enabled the Company to increase revenues in this segment.

The European energy market was very volatile during 2022, and concerns about its availability resulted in very large price fluctuations.

Arctic Paper implements numerous investment projects aimed to significantly increase energy self-sufficiency - both in the paper and pulp segments.

The company consistently implements the 4P Strategy, and the results achieved confirm that Arctic Paper is a reliable and solid partner for its clients and meets the expectations of shareholders.
